Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This first Office Action is in response to Applicant's originally filed Application received in the Office on August 4, 2003.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, Applicant recites a "recess" in both lines 2 and 6. It is unclear whether these two recesses are the same or are first and second recesses. Correction or clarification is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Juenemann et al. (5,257,768). Juenemann et al. teach each feature of the claimed invention as shown in the attached marked-up copy of Juenemann et al.'s Figures 1-5. Regarding claim 3, the added limitations merely describe the process of making the

device and does not further add structural limitations. The methods of making the device as described in claim 3 have not been accorded any weight in this apparatus claim. Regarding claim 6, the head is molded into the housing.

Allowable Subject Matter

Claims 7 and 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Reasons for Indicating Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: Regarding claim 7, the prior art of record does not teach, in combination with the other features of claim 7, a clip fastening element comprising an elastically deformable intermediate position portion positioned between the clip fastening head located at one end and a guide heel located at the opposite end, wherein the housing comprises a passage position between two widened end portions wherein one end portion houses the clip fastening head and the other end portion houses the heel guide. Regarding claim 9, the prior art of record does not teach, in combination with the other features of claim 9, a rigid inner half-shell of at least one of the two complementary parts comprising a passage hole through which a bulge of the material of the elastic intermediate half-shell projects to prevent the device from moving relative to one of the pipes upon assembly of the two complementary parts around the pipes.

Prior Pertinent Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Pat No. '790 to Sentpali et al. teaches a protective pipe holder.

Conclusion
